DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/21/2005 has been entered.

Response to Arguments

Applicant's amendment and arguments filed 6/21/2005 have been fully considered and are persuasive to overcome the rejections under 35 USC 102 and 35 USC 103 in the previous office action.

Claim Rejections - Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2152

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 80 and 120 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18 of U.S. Patent No. 5,864,682. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite essentially the same limitations.

Claim 80	Claim 18 of Pat. 5,864,682
method of manipulating video data comprising:	method of preprocessing an original digital data stream ...
accessing digital audio-visual work ...	(accessing is an inherent step in order to process the digital data stream)
determining a start position for frame data ...	for each frame ... determining boundaries ... for the frame
generating tag data including data representing the start position ...	generating tag data that includes boundary data ...

Art Unit: 2152

storing the tag data separate from the digital audio-visual work.	storing said tag data separate from said original digital data stream.
---	--

Claim 120 similarly recites a system carry out
substantially identical steps in claim 18 of Pat. 5,864,682.

Allowable Subject Matter

Claims 80-159 are allowable upon filing of a terminal
disclaimer to patent 5,864,682.
